Experience

(Frontend) Team Lead

DPC Consulting Kft

2018 Sept - Present

I was the lead developer and the scrum master of 5-10 developers, while we worked on various Thai webshops. Since May 2019 I am the frontend architect of a new webshop for an Italian luxury brand and also work as a team lead of 5-10 people.Since September 2020 I coordinate the backend development team daily work. I improve our team with interviewing new candidates and help transforming project team structure.I'm also responsible for regular feedbacks for the team members and report for the managers about the people.

Frontend Trainer

DPC Consulting Kft

2017 Apr - 2018 Sept

I participated in several 8-12 weeks long bootcamps as a Lead Frontend Instructor. I created teaching materials such as slides, handouts, coding exercises, exams. I also was on a daily face-to-face contact with the students in the classroom. I explained them the subject, helped them with the coding exercises and we did live coding ánd pair programming together. These bootcamps also included a final project where I usually acted as a PO and agile coach. I provided feedback for the students and the stakeholders, managers about the development of each student.

Frontend Lead developer

Mortoff IT Consulting and Services Ltd.

2016 Apr - 2017 Apr

I took part in various projects and mentored 1-3 junior developers working on different projects. I also worked closely with the sales team and helped them with estimations and project solution plans and also made proof of concepts for the sales demos.

Software Engineer

Mortoff IT Consulting and Services Ltd.

2013 Apr - 2016 Apr

worked on the CRM solution of one of Hungary's well-known media publisher company. We introduced and customised the SugarCRM for their needs. I took part in the introduction of a new CRM system (Siebel) for a housing fund company as part of a bigger program where their changed multiple system in the same time. So it was a challenge to integrate with the other systems which were developed with different pace by multiple vendors.

Developer

Pikcsörsz Kft

2011 Dec - 2013 Nov

I founded the company with a friend and we did project based works for marketing agencies. I created various interactive ads and banners for websites. We created a website for 2 online magazines. I developed a CRM solution for a small business and integrated with their Virtual Call Center software. As the founder of the company I brought in new leads and negotiated with them about the contracts. During this time I was also the part of the startup community and I helped organizing meet-ups for the IT community

Freelance Web Developer

Self-employed

2007 Sept - 2011 Dec

During my studies I created small websites like landing pages, one-pagers, blogs and interactive games for events.
